**DETAILED ACTION**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-49 and 101-133, drawn to a refueling drogue with a rotating mass, classified in class 244, subclass 135A.
  - II. Claims 50-100, drawn to a refueling drogue with an active control system, classified in class 244, subclass 76A.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as being used to stabilize an otherwise uncontrolled drogue. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Martin Cosenzi on 6-24-04 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-49 and 101-133. Claims 50-100 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 50-100 to an invention non-elected without traverse. Accordingly, claims 50-100 have been cancelled.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(j).

6. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or make obvious the claimed refueling drogue. Specifically, the prior art fails to show a refueling drogue having a rotating mass which stabilizes the drogue through the gyroscopic effect. It is also noted that the term "KEAS" in the claims is a well known art term meaning "knots equivalent air speed".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Claims 1-49 and 101-133 are allowed.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thal et al, Green, and Stripling are cited as being of interest since they disclose aircraft refueling systems and a spin stabilized projectile.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is 703-306-4151. The examiner can normally be reached on Monday to Thursday, from 8:00 a.m. to 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
